Major Mann Page Given His Views in

Regard to Yesterday's Election. PETERSBURG, VA., Nov. 7,-Major Mann Page, president of the Farmers' Alliance of Virginia, arrived here this Afternoon from Rock Mount, this State, where he and Congressman Swanson addressed a large People's party meeting yesterday. Major Page told me that he spoke in the open air for three hours and a quarter on a stretch. He missed railroad connections to-day and was unable to reach his home at Brandon, Prince George county to as to vote. He says George county, so as to vote. He says that there had been considerable scratching in this election, and this, with the uncertainty of the colored vote, would make majority," said he, "will depend on wheth-er or not the white Democratic vote was brought out. Major Daniel's speeches in different parts of the State may have had or Page said that Major Daniel's speeches Jor Page said that Major Daniel's speeches in the cantrass were worth at least 10,000 of 10,000 votes to the Democratic ticket, on account of his position on the silver question, Continuing, Major Page said he believed the vote in the fourth congressional district and the Black Belt, generally, would give the Populist ticket a good majority if the polls were not thrown out on account of irregularities, etc., as in the Goode election. Major Page thought that if it had not been for the fact that the Legislature elected at this election the Legislature elected at this election would elect all of the Supreme Court judges and two United States senators, the Democratic ticket, headed by Colonel O'Ferrall, would have been defeated and Captain Cocke would have been elected by 20,000 majority, because Democrat voters would not have been gotten to the polls. Major Page said if the votes were accurately and fairly counted he did not believe the Democrats would have 10,000 majority in the State. Major Page left this evening for Richmond.

UP GOES SILVER. It is Said That Enssia Will Adopt It as a

Part of Her Monetary System. WASHINGTON, D. C., Nov. 7 .- The trength displayed by silver during the past week has attracted the attention of the treasury officials, who keep a close watch on the least fluctuations in matters affecting the value of money, the world over. Silver is reported to-day in London as 3-16 pence per ounce higher than yesterday, the figure to-day be-

ing 329-16 pence per ounce.

The cause for this strength is believed here to be due not to temporary speculation, but to a well grounded opinion that Russia in the near future will adopt silver as a part of her monetary system. It is stated at the treasury department that infinations have been received that Russia will replace her uncovered paper money with silver to be used for subsidiary coin. At present the amount of silver in use in Russia as money is not fifty-three cents per cap-ita. It is stated here that Russia can easily absorb \$250,000,000 of silver, and is desirous of doing so for the purpose of pushing har commerce in the east with Persia, India and China, which use sil-

ver almost exclusively as money. SMALL-IOX IN WYTHE.
